TEEYA PRODUCTIONS

ENTERPRISE AI OPERATING SYSTEM

MARCH 2026

Stop Renting.
Start Owning.

Replace fragmented software subscriptions with a **unified business operating system you own** — 100%

- 100% CLIENT-OWNED INFRASTRUCTURE
- NO MONTHLY SUBSCRIPTIONS
- NO VENDOR LOCK-IN

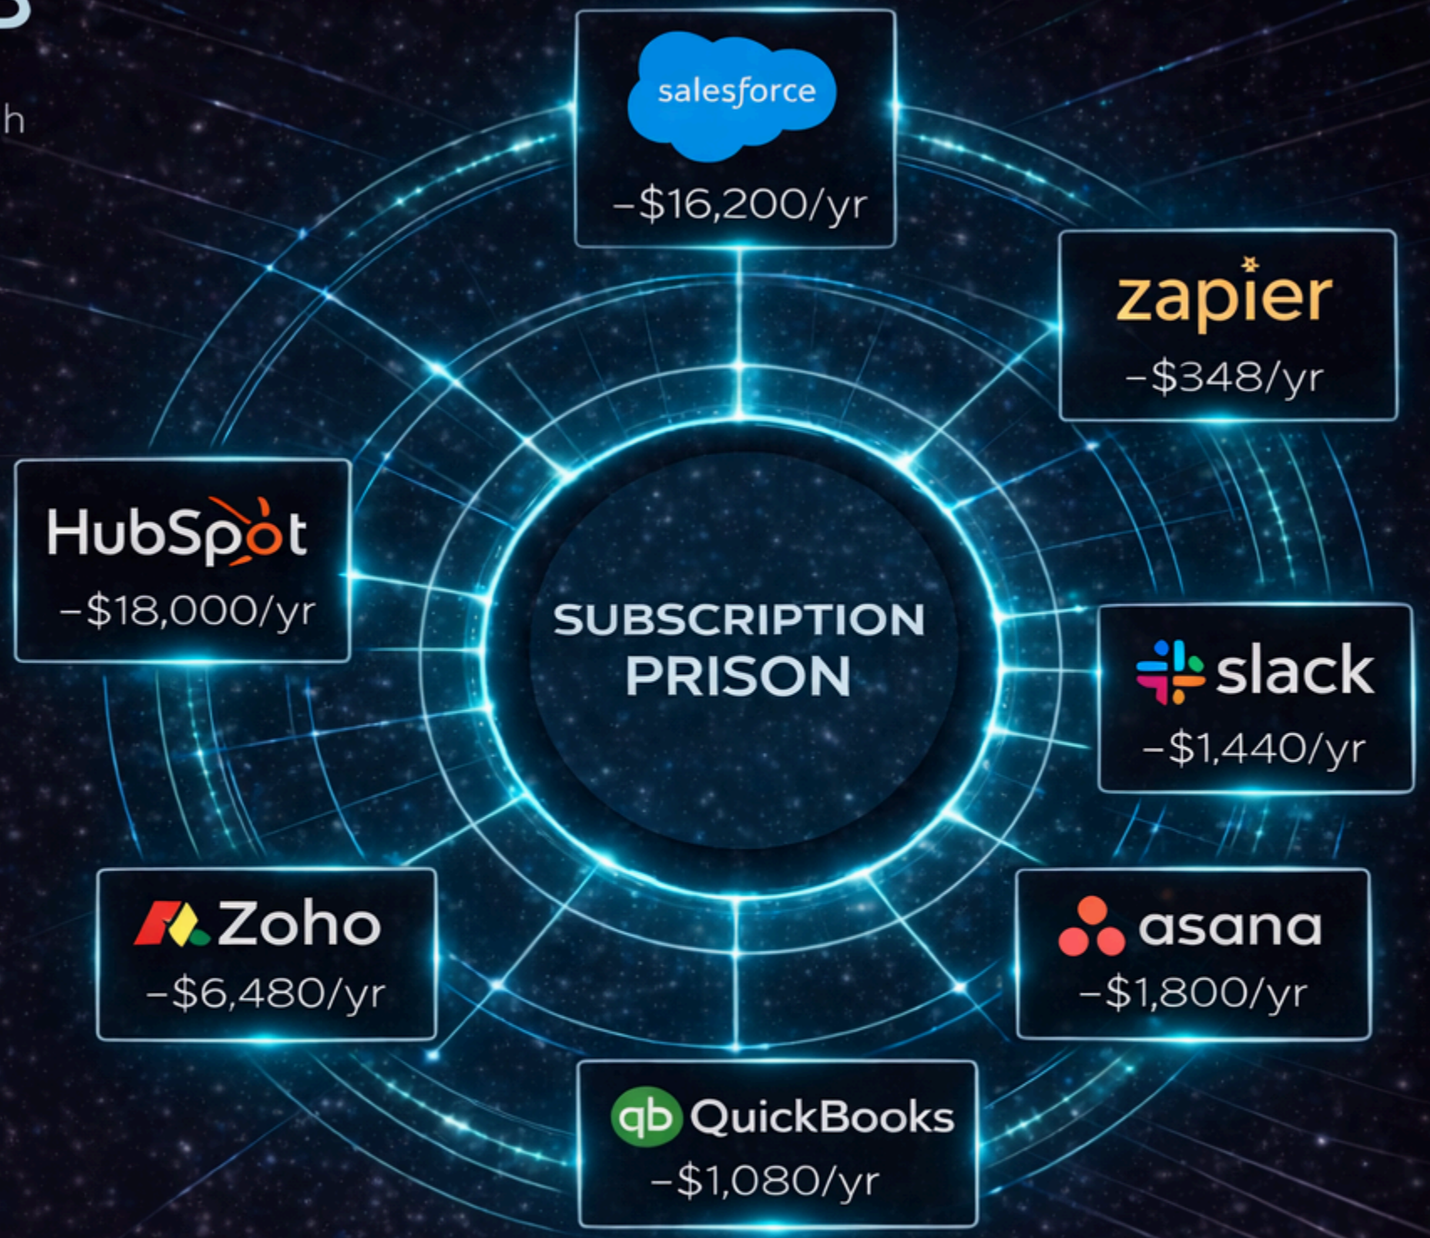
ONE PLATFORM → INFINITE POSSIBILITIES

THE SOFTWARE MAZE

10-15 SEPARATE TOOLS | 10-15 LOGINS | 10-15 DATABASES

THE SAAS RENTAL TRAP

Modern businesses bleed efficiency and capital through fragmented SaaS rentals. You pay for access, but you own nothing.



Disconnected Apps:
Siloed data creates blind spots and kills workflow momentum.

Rising Recurring Costs:
Costs compound with headcount.

0% Ownership:
You are a tenant.

LOCKED OUT
YOUR OWN BUSINESS

Because the systems running your company are not actually yours. They are rented infrastructure. When the vendor updates or changes the system, your business can break overnight.

LOGIN SYSTEM DOWN
Employees and admins cannot access company systems.

PAYMENTS STOP PROCESSING
Checkout, card terminals, or gateways fail.

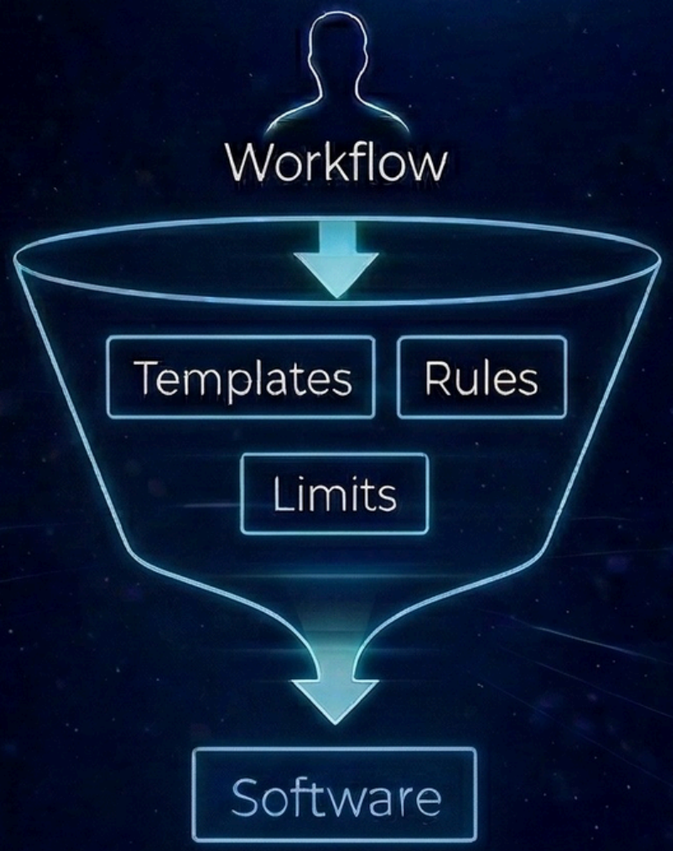
CRM UNAVAILABLE
Leads, pipeline, and customer records inaccessible.

ORDERS CAN'T BE PROCESSED
Sales systems and e-commerce stop working.

DOCUMENTS INACCESSIBLE
Contracts, proposals, and internal files locked.

EMAIL & COMMUNICATION FAIL
Client communication and support halted.

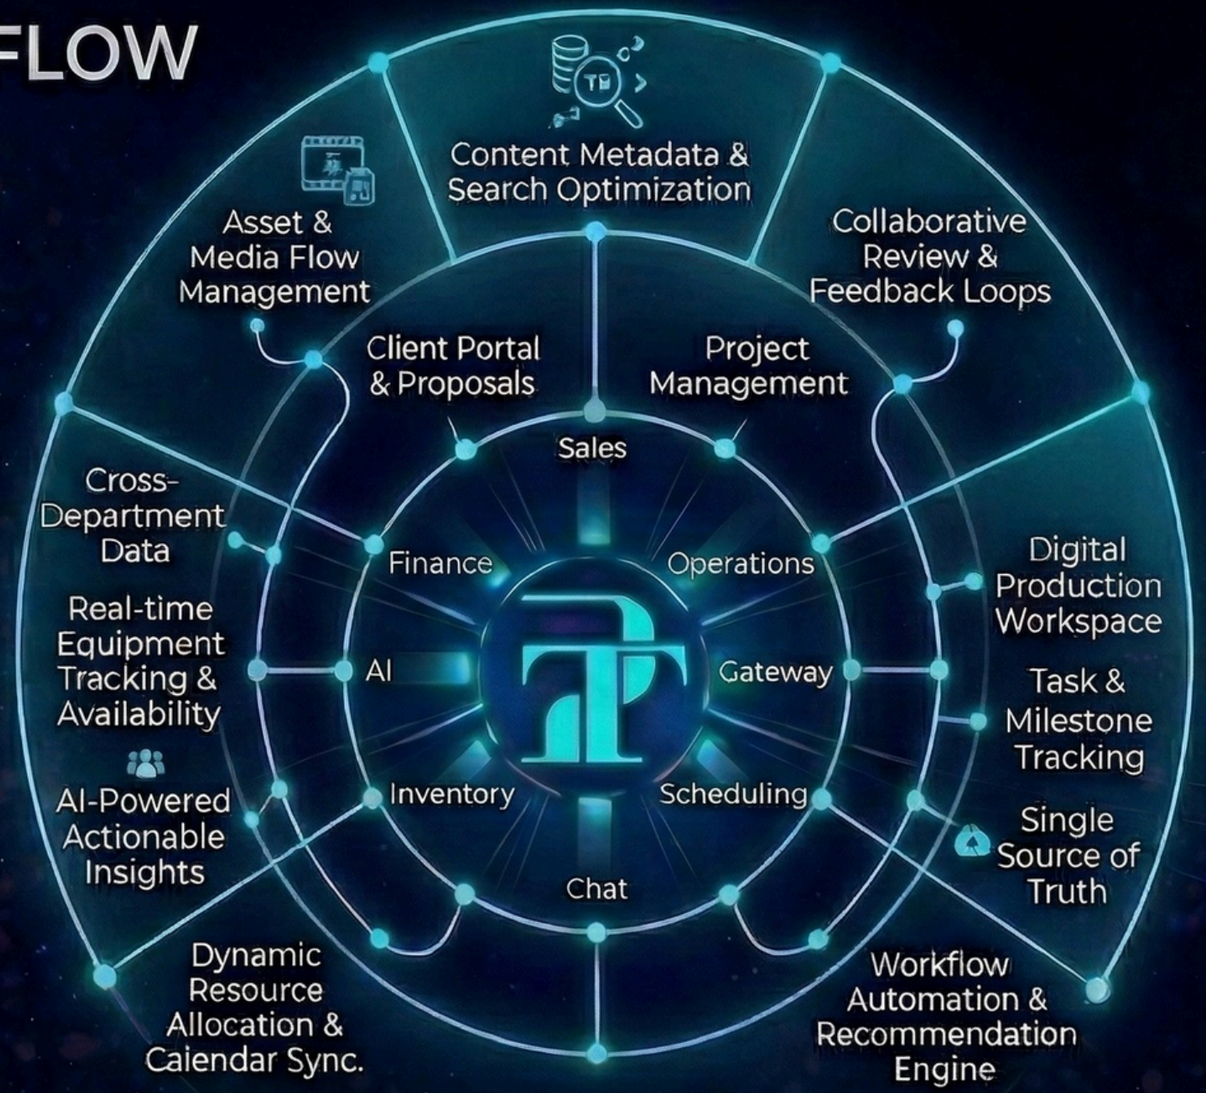
BUILT AROUND YOUR WORKFLOW



TRADITIONAL SaaS

You Adapt.

Your workflow must conform to the software.



TP OS

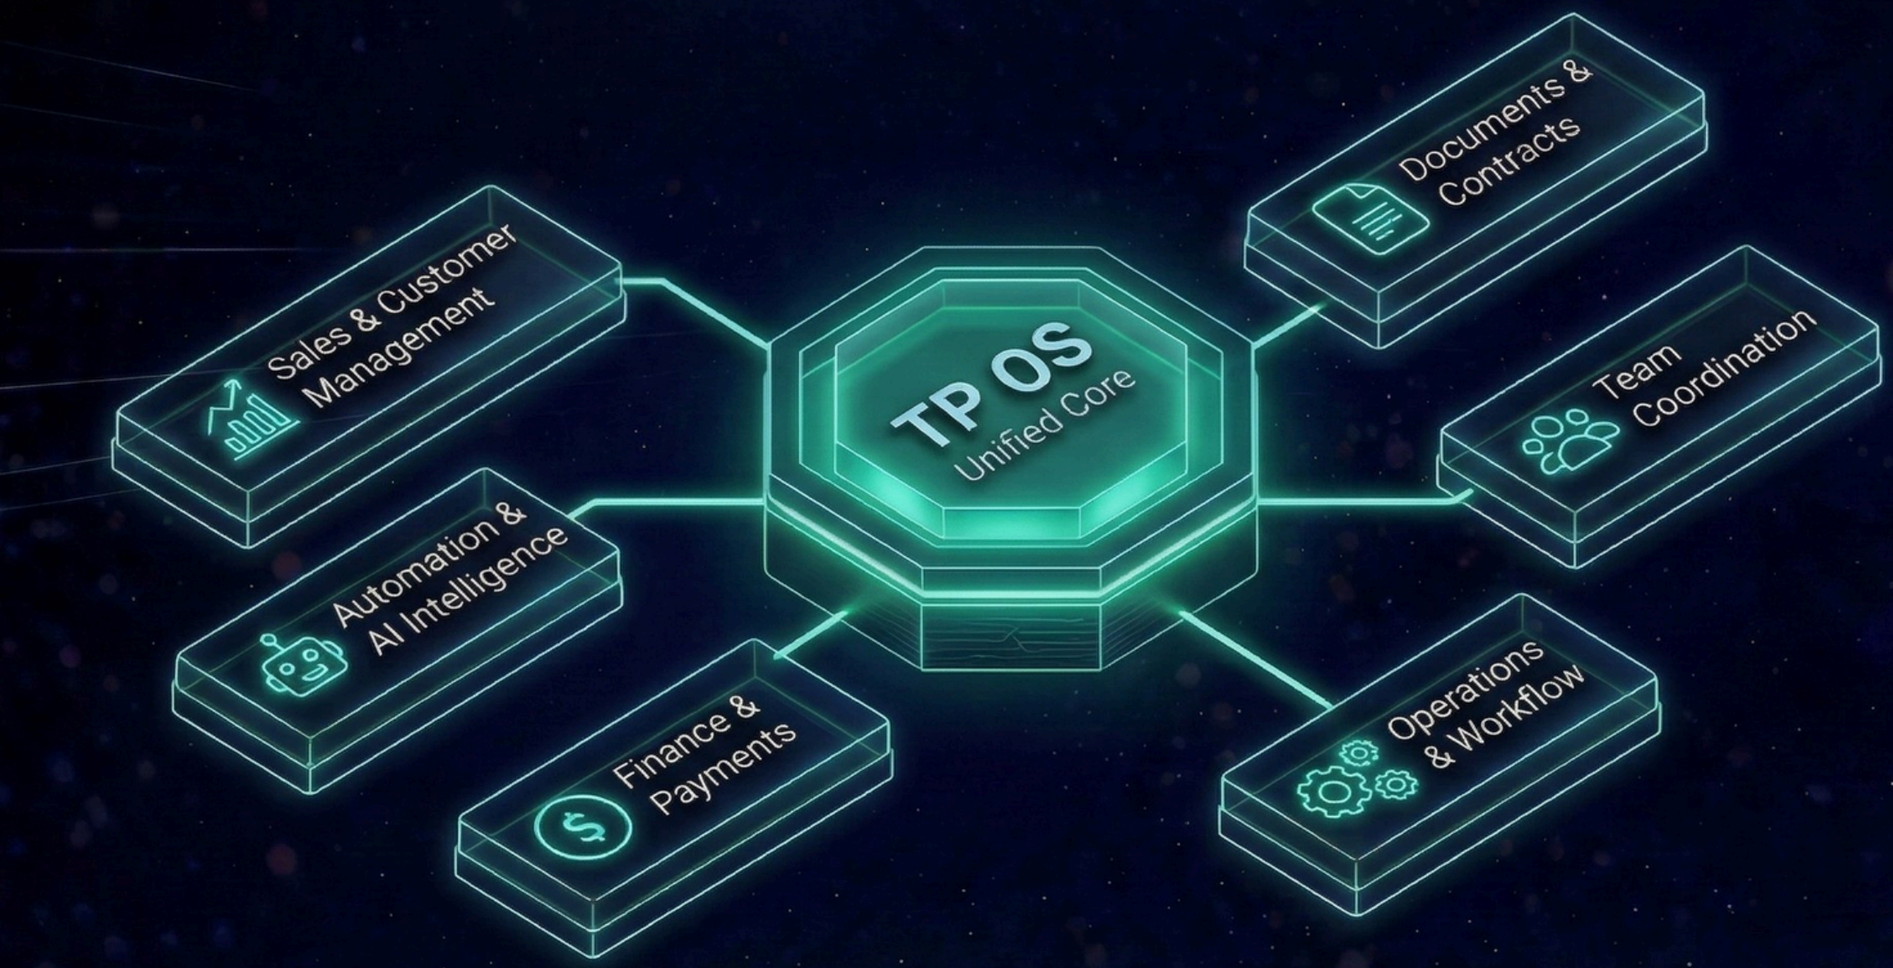
Software Adapts to You

Your workflow defines the system.

ONE PLATFORM. INFINITE POSSIBILITIES

Your Unified AI Operating System

One codebase. One database. 100% Owned. Replace fragmented software with a custom-built, intelligent command layer.



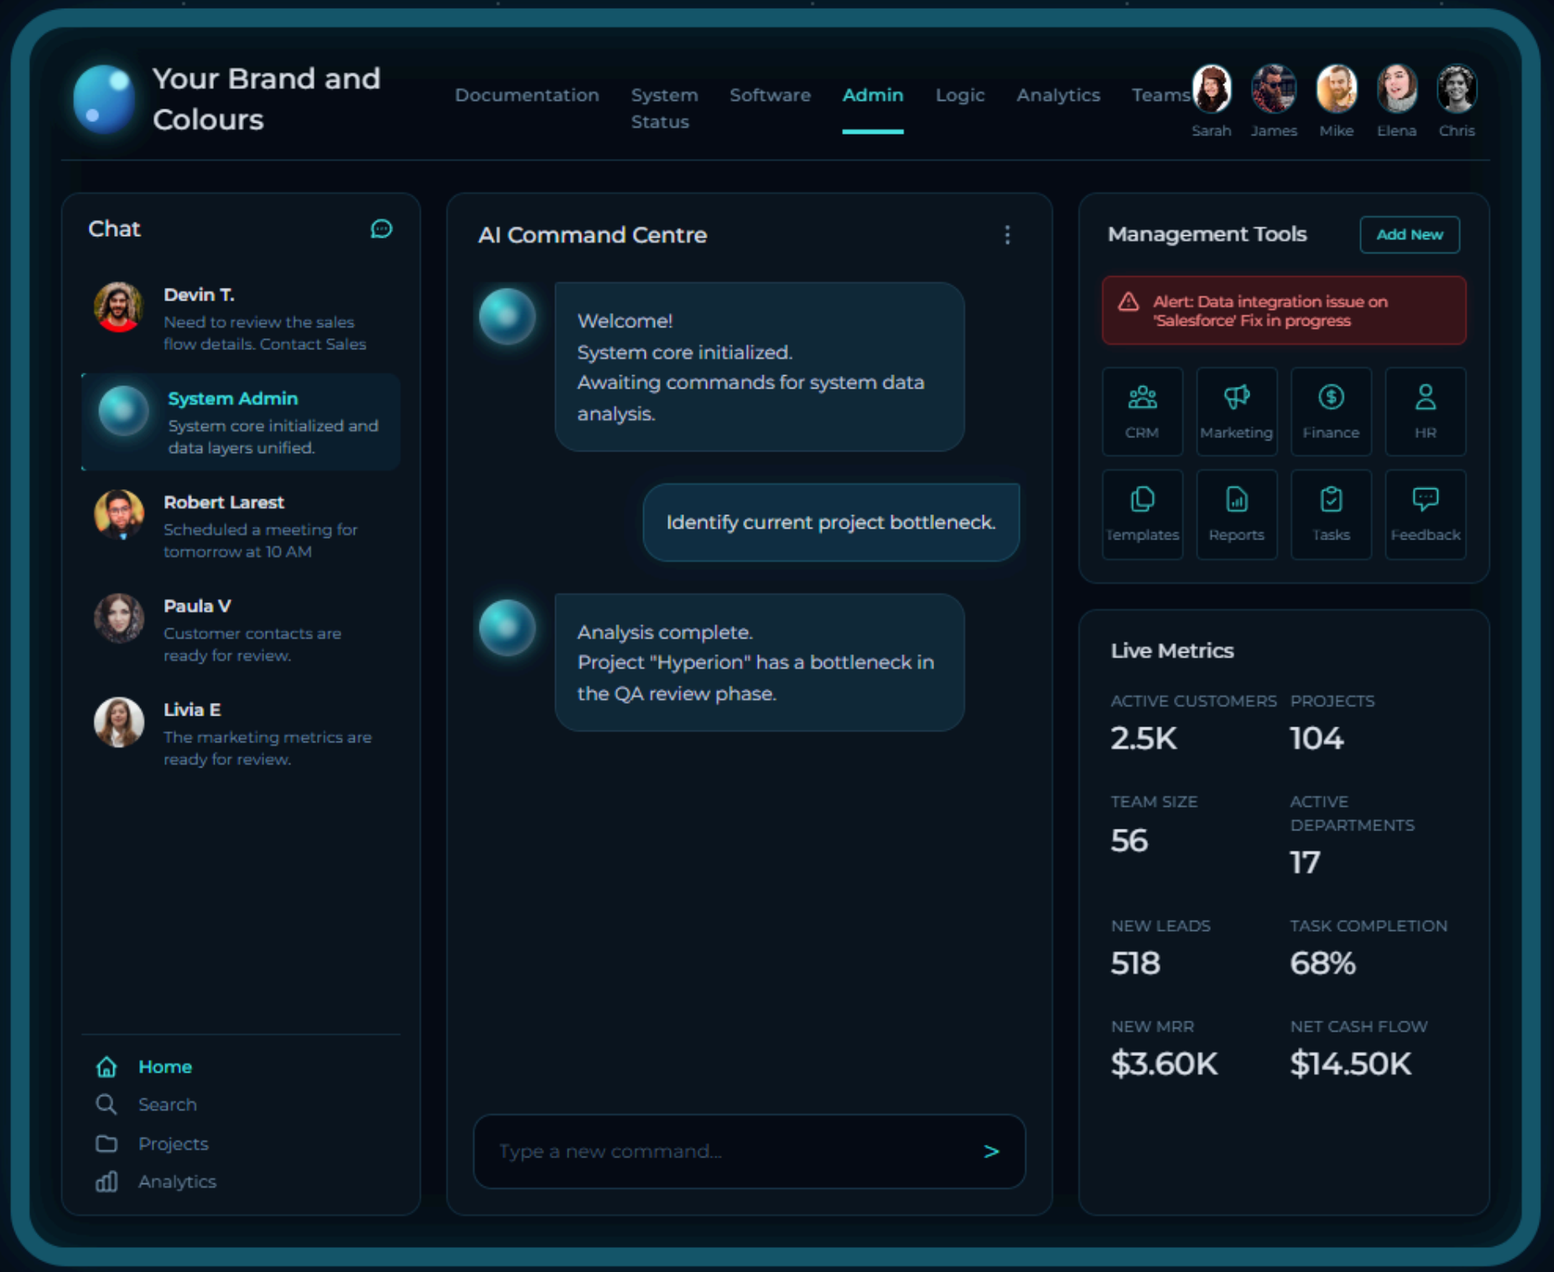
Replaces the Rentals

- ~~Salesforce~~
- ~~HubSpot~~
- ~~QuickBooks~~
- ~~Slack~~
- ~~Monday.com~~
- ~~Mailchimp~~

1 Platform | 1 Database | 100% Owned

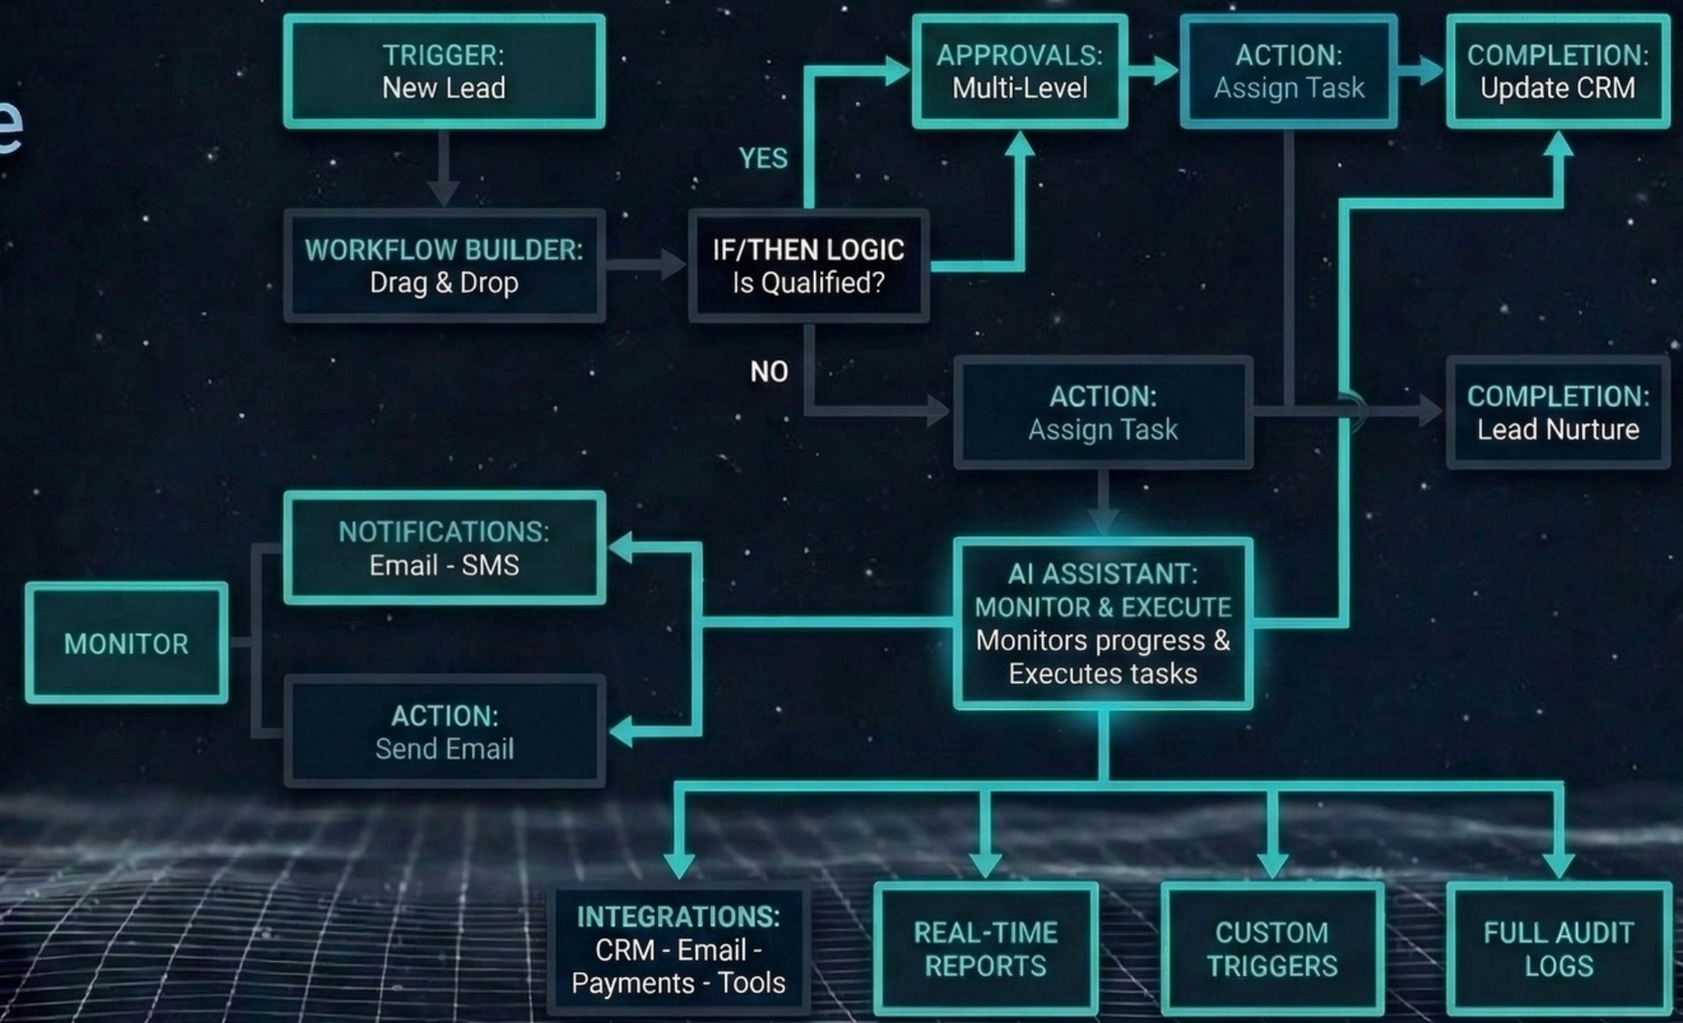
The Enterprise **Command Centre**

- Fully branded interface
- Native AI chat and process logic.
- Unified Management Dashboard.



The Enterprise Workflow Automation Centre

- Fully branded interface
- Complex IF/THEN automation logic
- Auto-approval routes
- Real-time reporting & audit logs
- Smart reminders & AI execution



Labour Efficiency

Organizations reclaim 15-30% of productive capacity from daily operations without reducing headcount.

Cost Elimination

Recurring software fees and operational overhead are replaced with a controlled, owned system.

Complete Transparency

All activity is visible and auditable in real time, eliminating blind spots and guesswork.

Long-Term Stability

System ownership replaces dependency, ensuring predictable, controlled growth and continuity.

Scalable Output

Revenue and operational capacity increase without proportional hiring or management overhead.

Data Sovereignty

100% owned system. Your data never leaves your control, unlike cloud SaaS solutions.

The Ultimate Comparison: Rent vs. Own

	All The Others (SaaS Rental Model)	Teeya Productions (Ownership Model)
Capability	Disconnected Apps	Full Enterprise AI OS
3-Year Cost	$20,000 – $100,000+ (Recurring)	$7,500 – $125,000 (One-time)
Ownership	0% (You Rent Access)	100% Client Owned
Design	Generic Templates	Fully Custom Brand UI/UX
Scalability	Price Increases with Growth	Modular Upgrades
Data Control	Vendor-Owned Servers	Private Infrastructure

The Lifetime Structural Guarantee

Whether you choose a single module, the Foundation System, or a Complete Digital Workforce, your code is **structurally guaranteed**. If there is a coding issue in the foundation—excluding third-party API changes—it is **repaired or replaced at no additional cost**.

100% Tax Deductible Asset. No hidden subscription fees.

Modular Build

START SMALL. SCALE LATER.

$9,000 /module

Targeted automation for specific departments (Sales, HR, Ops) to solve immediate pain points.

- Single department AI automation (Sales, HR, Finance, Operations, or Custom)
- Your choice: Desktop OR Mobile application
- Fully branded interface (logo, colours, workflow alignment)
- Core workflow mapping & automation logic setup
- Smart task routing & internal process automation
- Integration with existing software (API-based sync)
- Real-time collaboration & notifications
- Centralized reporting & performance analytics
- Secure role-based access control
- Enterprise-grade security & audit logs
- Private data architecture (no vendor lock-in)
- 100% ownership of system & full data control
- Expandable foundation for future modules

BEST VALUE

Foundation System

THE "SAAS KILLER" PACKAGE

$7,500 one-time

Replace Salesforce, HubSpot & Monday.com with a private system you own forever.

- 100% Asset Ownership (code & database)
- Secure Web Application (browser-based)
- 10 core tools of your choosing + brand colours & logo
- Built-in AI assistant with foundational automations
- Unlimited users (10 included, expand as you grow)
- Visual Pipeline Management
- Integrated Invoicing & Payments
- Role-Based Admin Controls
- Document & Contract Storage
- Complete instructions to run, maintain & upgrade
- Modular expansion ready

Complete Digital Workforce

TOTAL BUSINESS TRANSFORMATION

$125,000 /project

Full 18-month transformation. All systems, desktop & mobile included.

- Complete enterprise system architecture & workflow design
- Unlimited tools created or integrated (CRM, ERP, HR, Finance, Operations, Automation, Custom Logic)
- Ongoing optimization & stability monitoring
- Security oversight & system integrity validation
- Unlimited users (internal teams + external collaborators)
- Separate applications for Employees and Clients (Web + Mobile)
- Full AI automation layer across departments
- Cross-department data synchronization (single source of truth)
- Custom UI aligned to brand + operational logic
- 100% ownership of system + full data control
- Private infrastructure deployment (no vendor lock-in)
- Future-proof system evolution framework
- Priority performance tuning
- Internal admin manuals
- Technical maintenance instructions
- System evolution roadmap
- Guidance to safely maintain & expand independently
- 18-month phased transformation (Discovery → Architecture → Build → Automation → Deployment → Optimization)

Your Transformation Blueprint

STEP 1:
Discovery.
Deep-dive into your operations and pain points.

STEP 2:
Architecture.
Custom system design tailored to your logic.

STEP 3:
Build.
Full development with your brand and tools.

STEP 4:
Automation.
AI logic, workflow routing, and task automation.

STEP 5:
Deploy.
Launch on your own private infrastructure.

STEP 6:
Optimize.
Ongoing tuning, support, and system evolution.

Ready to Stop Renting Your Operations?

Secure your operational freedom. Replace fragmented software with a unified enterprise asset you own 100%.
